WEA 5th Annual Conference in India

WEA (World Education Alliance) held its 5th Annual Conference in India in October, 2009. Discussions during the Conference resulted in goal setting and strategic planning for educational exchange in the next 5 years. The main focus will be to promote the exchange of ideas and experience in teachers and students for an international outlook.

In addition to expanding the exchange experiences for students so that it will be more inclusive, we also took the opportunity to invite other members who represented prestigious schools in the US, Germany, South Africa, Singapore, etc. to participate in a Water Project in Nanjing. Organised by Nanjing Privately-run Yuying Foreign Language School, co-organised by HKBUAS and supported by the Water Resources Department and Nanjing Water Resources Management Centre of Nanjing City, the project will be held in March, 2010.
