

Exchange Programme in Denmark

With the continuous effort to provide students with an opportunity to experience another culture outside Hong Kong, four Grade 9 and five Grade 10 students had the chance to go to Odsherreds Efterskole(OE) in Denmark from November 3 to 13, 2018. OE is a boarding school for senior grade students that aims to guide its students to discover themselves before entering high school.

During the visit, our students attended lessons with their local buddies and stayed with them in their dormitories on weekdays. Our students witnessed what the Danish open sandwich is, how Danish students clean their own rooms and have a kitchen duty at the school cafeteria. Students also attended lessons such as robotics and used LEGO for education.

Apart from attending lessons, our students explored Copenhagen and visited Christiansborg Palace where they learnt about the history of the Palace and the Danish Royal Family. They even got a chance to walk around all the special rooms, such as the Royal Reception Room and The Great Hall, where the Queen holds meetings and the Royal Family holds parties. That indeed was a truly unique experience for our students.

To make their trip even more fruitful, students lived with host families on the last weekend, where they experienced local culture, food and lifestyle.

This exchange programme provided students with life-long friendships and further enhanced their creativity, critical thinking, communication and problem-solving skills.
